

Still — User Guide

Francis Distillery & Magnolia Barrel House

Privacy & Data Structure

Before anything else — here is how your data is protected.

What	How it works
Your barrels	Stored in a private, encrypted database. Only users you authorize can see them.
Your login	Username + password. No email required. Credentials never appear in the app UI.
Demo data	Completely separate from your real data. Exploring the demo cannot touch, change, or expose Francis or Magnolia barrels.
Who has access	See the table below. Nobody outside this list can log in.

Who Can Access What

Username	Name	Francis Distillery	Magnolia Barrel House	Demo
WFRANCIS	William Francis	✔ Full access	✔ Full access	✔ Full access
DFRANCIS	Danielle Francis	✔ Full access	✔ Full access	✔ Full access
RRUSSELL	Ryan Russell	✔ Full access	✔ Full access	—
GASH	Gareth Ash	—	—	👁 Read only

Full access — can add, edit, delete barrels, upload photos, record voice notes, run reports. **Read only** — can browse and search but cannot make changes. — — no access at all. That distillery is invisible to them.

Logging In

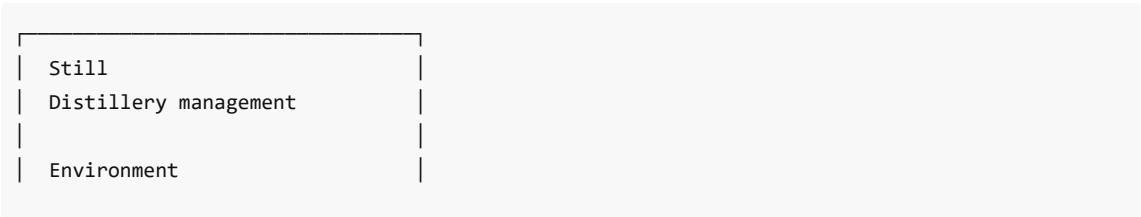

Open the app at:

<https://barrel-tracker-rpr8605s-projects.vercel.app>

Save this to your home screen for one-tap access (instructions at the bottom of this guide).

Step 1 — Choose Your Environment

The first thing you see is the **Environment** dropdown at the top of the login card.

Demo – Explore the app ▾

Your name

Enter any name

Enter Demo

[Screenshot: Login screen — Demo selected]

The dropdown contains:

Option	What it is
Demo — Explore the app	500 practice barrels. No password. No real data.
Francis Distillery	William & Danielle's private barrel house.
Magnolia Barrel House	Second barrel house. William & Danielle.
Russell's Reserve	Shown for appearance — no accounts exist here.
Blue Ridge Virginia	Shown for appearance — no accounts exist here.

Scenario A — Exploring the Demo

Use this first. Get comfortable with the app before touching real data.

1. Open the app.
2. Leave the dropdown on **Demo — Explore the app**.
3. Type **any name** in the "Your name" box — it can be anything.
4. Tap **Enter Demo**.

[Screenshot: Demo login screen with name filled in]

You are now inside a demo distillery with 500 barrels. Everything works — search, filters, voice notes, photos, reports. None of it is real data. You can add, edit, or delete freely without consequence.

Scenario B — Logging Into Francis Distillery

1. Open the app.
2. Tap the **Environment** dropdown → select **Francis Distillery**.
3. Enter your **username** (WFRANCIS or DFRANCIS).
4. Enter your **password** (provided to you separately).
5. Tap **Sign in**.

[Screenshot: Login screen — Francis selected, username/password fields visible]

You will land on the Francis Distillery dashboard showing your real barrels.

Scenario C — Logging Into Magnolia Barrel House

Same steps as Francis, but choose **Magnolia Barrel House** from the dropdown.

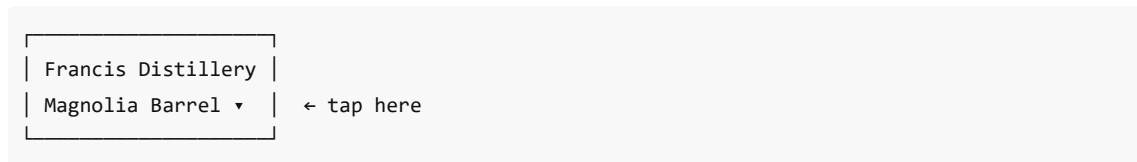

1. Tap the **Environment** dropdown → select **Magnolia Barrel House**.
2. Enter your username and password (same credentials as Francis).
3. Tap **Sign in**.

[Screenshot: Login screen — Magnolia selected]

Switching Between Distilleries (Without Logging Out)

Once you're inside the app, you can switch between Francis and Magnolia without logging out.

Look for the **distillery name** near the top of the left sidebar (or the menu on mobile). Tap it to reveal a switcher dropdown.

[Screenshot: Distillery switcher dropdown open]

Tap the other distillery name. The app reloads showing that distillery's barrels. Your login session stays active — you don't need to re-enter your password.

Face ID / Touch ID (Optional — Set Up After First Login)

After signing in with your password the first time, you can enable biometric login for future sessions.

1. Tap the menu → **Settings**.
2. Scroll to **Security**.
3. Tap **Enable Face ID** (iPhone) or **Enable fingerprint** (Android).
4. Follow the device prompt to confirm.

[Screenshot: Settings → Security section]

On your next visit, a **Sign in with Face ID** button will appear on the login screen beneath the regular sign-in button. Tap it — the app will authenticate without a password.

Face ID and Touch ID are stored entirely on your device. The app never sees your biometric data.

Using the App

Dashboard

The dashboard is your home screen. It shows:

- **Total barrels** in the current distillery
- **Ready to bottle** — barrels estimated at peak
- **Aging** — still maturing
- **Bottled / Dumped** — historical

[Screenshot: Dashboard — summary cards]

Tap any card to jump directly to that filtered barrel list.

Browsing Barrels

Tap **Barrels** in the bottom nav (mobile) or left sidebar (desktop).

[Screenshot: Barrel list view]

You'll see a scrollable list of barrels. Each row shows:

- Barrel number
- Mash bill (grain recipe)
- Status (Aging / Ready / Bottled)
- Age

Tap any barrel to open its full detail card.

Filtering & Searching

At the top of the barrel list, tap the **search bar** and type anything — barrel number, grain type, flavor tag, warehouse location, etc.

Tap the **filter icon** (sliders) to narrow by:

- Status
- Finish type (Port, Sherry, Double Oaked...)
- Entry year
- Warehouse row/tier

[Screenshot: Search bar active with results]

Adding a New Barrel

Tap the + button (top right of the barrel list or bottom-right floating button on mobile).

[Screenshot: New barrel button]

Fill in the details:

Field	What to enter
Barrel Number	Your barrel ID (e.g. MAG-001)
Mash Bill	Grain recipe (e.g. 72% Corn, 18% Rye)
Source Distillery	Where it was made
Entry Date	When it went into the barrel
Entry Proof	Proof at fill
Warehouse	Row, slot, and tier
Finish Type	None, Port, Sherry, etc.
Tags	Flavor notes

Shortcut — Scan a Label: Tap the **camera icon** inside the new barrel form. Point your phone camera at the barrel label or paperwork. The app reads the text and fills in the fields automatically. Review and tap **Apply**.

[Screenshot: Label scanner camera view]

[Screenshot: Extracted fields after scan]

Barrel Detail Page

Tap a barrel to see its full record.

[Screenshot: Barrel detail — top section]

Sections on the detail page:

- **Header** — barrel number, status badge, age
- **Specs** — mash bill, proof, warehouse location
- **Tags** — flavor profile tags (tap + to add more)
- **Predicted Peak** — AI estimate of when it's ready
- **Photos** — up to 3 photos. Tap the camera icon to add.
- **Voice Notes** — tap the microphone to record a note. The app transcribes it and extracts flavor tags automatically.
- **History** — log of all changes

[Screenshot: Barrel detail — photos and voice note section]

Recording a Voice Note

On any barrel detail page:

1. Tap the **microphone icon**.
2. Speak your tasting note — e.g. *"Nice vanilla on the nose, little bit of oak, good color, I think this one's getting close."*
3. Tap **Stop**.

The app sends the recording to AI, which:

- Transcribes the note
- Extracts flavor tags (vanilla, oak, etc.) and suggests adding them to the barrel
- Saves the note with a timestamp

[Screenshot: Voice note recording in progress]

[Screenshot: Transcribed note with extracted tags]

Warehouse Heat Map

Tap **Warehouse** in the nav.

[Screenshot: Warehouse grid view]

The heat map shows your warehouse laid out by row and tier. Color coding:

-  Green — barrel is aging normally
-  Yellow — approaching peak
-  Red — at or past predicted peak

-  Gray — empty slot

Tap any cell to jump to that barrel.

AI Blending Suggestions

Tap **Blend** in the nav.

The app analyzes your barrel inventory and suggests combinations based on complementary flavor profiles. Each suggestion shows:

- Which barrels to combine
- Expected flavor profile of the blend
- Estimated yield

[Screenshot: Blend suggestions page]

Tap **Create Batch** on any suggestion to turn it into a tracked batch.

Batches

Tap **Batches** to see all blends and bottling runs.

[Screenshot: Batch list]

Each batch tracks:

- Which barrels were used
 - Total yield
 - Bottling date
 - Story page (shareable link — see below)
-

Story Mode (Sharing a Batch)

Open any batch → tap **Share Story**.

This generates a public-facing page with a clean summary of the batch: the barrels, the blend rationale, and tasting notes. Safe to share with customers or on social media. It shows only what you choose — no pricing, no private data.

[Screenshot: Story page as customer sees it]

Compliance Reports

Tap **Compliance** in the nav.

[Screenshot: Compliance page]

Generate TTB-formatted production reports. Select a date range, choose the report type, and tap **Generate**. The report is formatted for TTB submission and can be downloaded as a PDF.

Settings

Tap **Settings** in the nav.

[Screenshot: Settings page]

Key options:

- **Account** — change your display name
 - **Security** — enable/disable Face ID or Touch ID
 - **Distillery** — view distillery info
 - **Sign out**
-

Add the App to Your Home Screen

iPhone (Safari)

1. Open the app in Safari.
2. Tap the **Share** button (box with arrow pointing up).
3. Scroll down and tap **Add to Home Screen**.
4. Tap **Add**.

The app icon appears on your home screen and opens full-screen, like a native app.

[Screenshot: iOS Add to Home Screen dialog]

Android (Chrome)

1. Open the app in Chrome.
 2. Tap the **three-dot menu** (top right).
 3. Tap **Add to Home screen**.
 4. Tap **Add**.
-

Quick Reference

What you want to do	How
Browse demo barrels	Login → Demo environment → any name
Access Francis	Login → Francis Distillery → WFRANCIS or DFRANCIS
Access Magnolia	Login → Magnolia Barrel House → same credentials
Switch distilleries	Sidebar → distillery name dropdown
Add a barrel	Barrels → + button
Scan a label	New barrel form → camera icon
Record a tasting note	Barrel detail → microphone icon
See warehouse layout	Warehouse tab
Get blend ideas	Blend tab
Run a report	Compliance tab
Enable Face ID	Settings → Security
